## Foam Attack

### Degreaser

This combined cleaner with special foam enhancer is ideal for use in all branches of the food industry. The product effortlessly removes proteins, animal and vegetable oils, fats and many other common pollution. Thanks to the oxidising agent the product also has a bleaching effect. This unique composition guarantees very active cleaning and degreasing.

-----	------	-------	-------

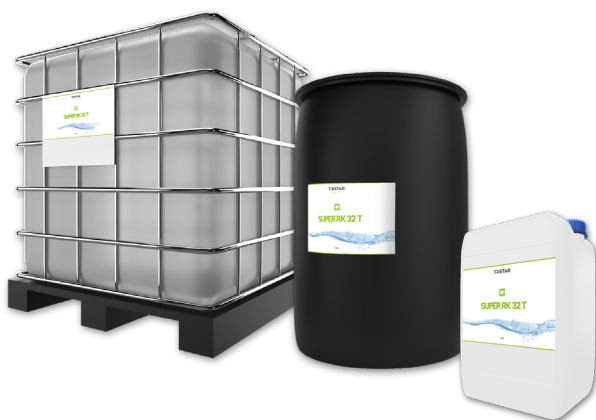

## AC Clean Eco Foam

### Degreaser / Stainless Steel Cleaner

The basis of this foam cleaner is a high-quality sugar tenside from a sustainable, natural source. Thanks to this tenside, the product penetrates deep into the contamination, allowing this to be easily released from the surface. Effectively removes fat, protein and other pollution in the food industry, without using strong alkaline concentrations. This increases safety and user-friendliness. Gives stainless steel an enhanced shiny effect after drying.

10L	200L	1000L	94182
-----	------	-------	-------

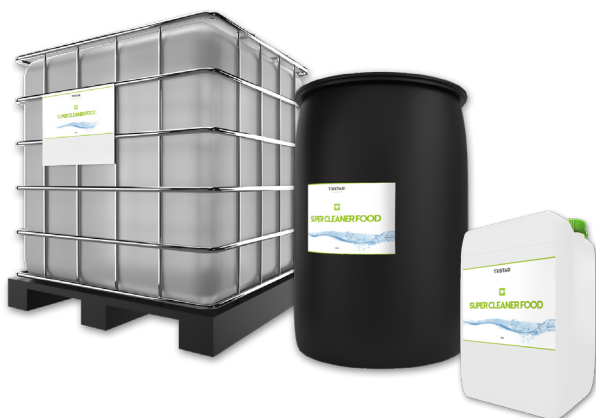

## Super RK 32 T

### Cleaner / Degreaser

Very highly concentrated liquid cleaner based on, among others, potassium hydroxide. The product effortlessly removes pollution based on (vegetable and animal) fats, oils and proteins. Therefore this product is ideal for cleaning pipe systems, as well as for cleaning smoke chambers, extractor hoods, worktables, ovens, baking trays and other equipment. The product is safe to use on almost any surface, provided it is used correctly.

20L	200L	1000L	94985
-----	------	-------	-------

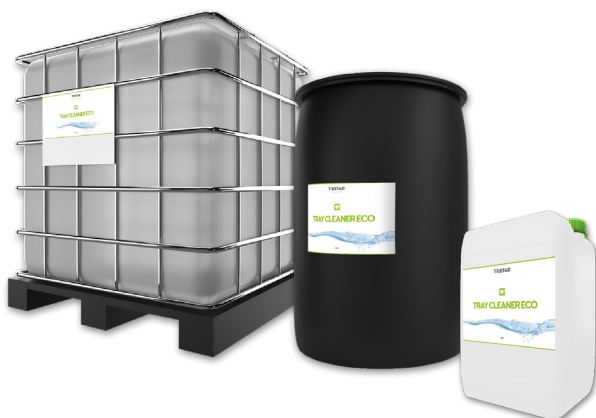

## Super Cleaner Food

### Cleaner / Degreaser

This virtually neutral liquid cleaner is developed specially for materials that are intolerant to strong acid or alkaline cleaning, such as aluminium. The product is free of corrosive chlorine and contains humidifiers that ensure excellent cleaning and degreasing. The molecular structure of the contamination is broken down and converted into a bacterially degradable mass, without any harmful residues. Due to the foaming properties this product is not suitable for CIP.

10L	200L	1000L	91398
-----	------	-------	-------

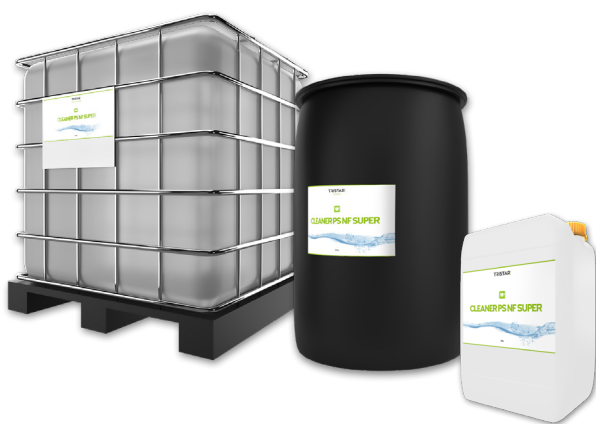

## Tray Cleaner Eco

### Cleaner / Degreaser

This low-foaming alkaline cleaner (chlorine-, EDTA-, NTA-free) is highly effective against most organic and inorganic pollution. Besides CIP and spray cleaning. Lime scale binding prevents lime and dirt deposits in equipment and machines. Precise and automatic dosing based on conductivity or flow and therefore cost-effective.

10L	200L	1000L	95003
-----	------	-------	-------

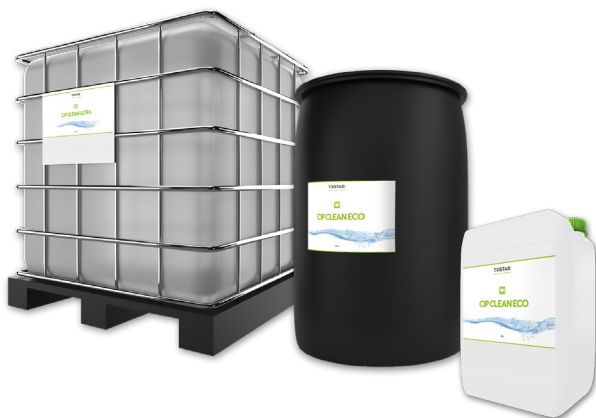

## Cleaner PS NF Super

### Cleaning / Disinfection

Non-foaming, water-miscible concentrate for the combined cleaning and disinfection of surfaces, equipment, recirculation systems and utensils. Only authorised for combating bacteria (excluding bacterial spores) and yeasts on surfaces that may come into contact with food and beverages as well as with their raw materials, with the exception of agricultural milking equipment and of kitchens in hospitals and other health care facilities.

10L	200L	1000L	authorisation number	10508
-----	------	-------	----------------------	-------

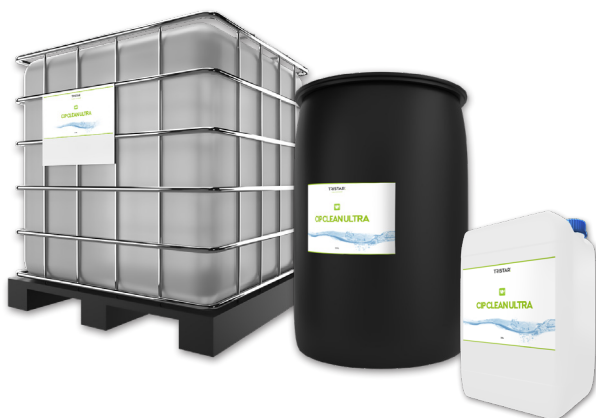

## CIP Clean Eco

### CIP Cleaning

Strongly alkaline cleaner for CIP-cleaning. Ideal for the food industry. The lime binding components in this product prevent floating particles of lime and ferric chloride from adhering to heating coils, pipes and nozzles of (heating) equipment, high-pressure cleaners, steam cleaners, etcetera.

20L	200L	1000L	95091
-----	------	-------	-------

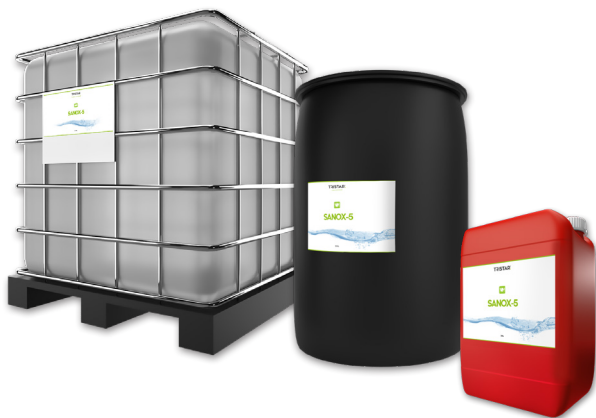

## CIP Clean Ultra

### CIP-cleaning

This alkaline cleaning product is ideal for application in the food industry, particularly in the dairy, soft drink and fruit juice industry. Suitable for any water hardness, thanks to the addition of special complexing agents and corrosion protectors. Effectively removes organic pollution.

20L	200L	1000L	93715
-----	------	-------	-------

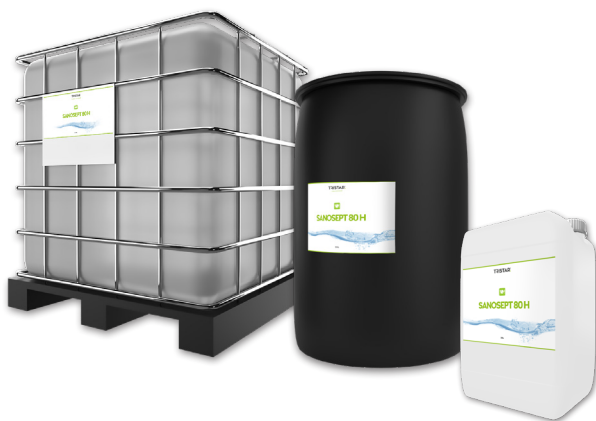

## Sanox 5

### Disinfection

This disinfection product is developed specifically for combating bacteria (bacterial spores excluded), yeasts and fungi in places where food and drinks are prepared, treated or stored, with the exception of agricultural milking equipment and kitchens in hospitals and in other healthcare facilities. The product can only be used with appropriate dosing equipment for disinfecting the inside of process equipment.

10L	200L	1000L	authorisation number 14460N	90828
-----	------	-------	-----------------------------	-------

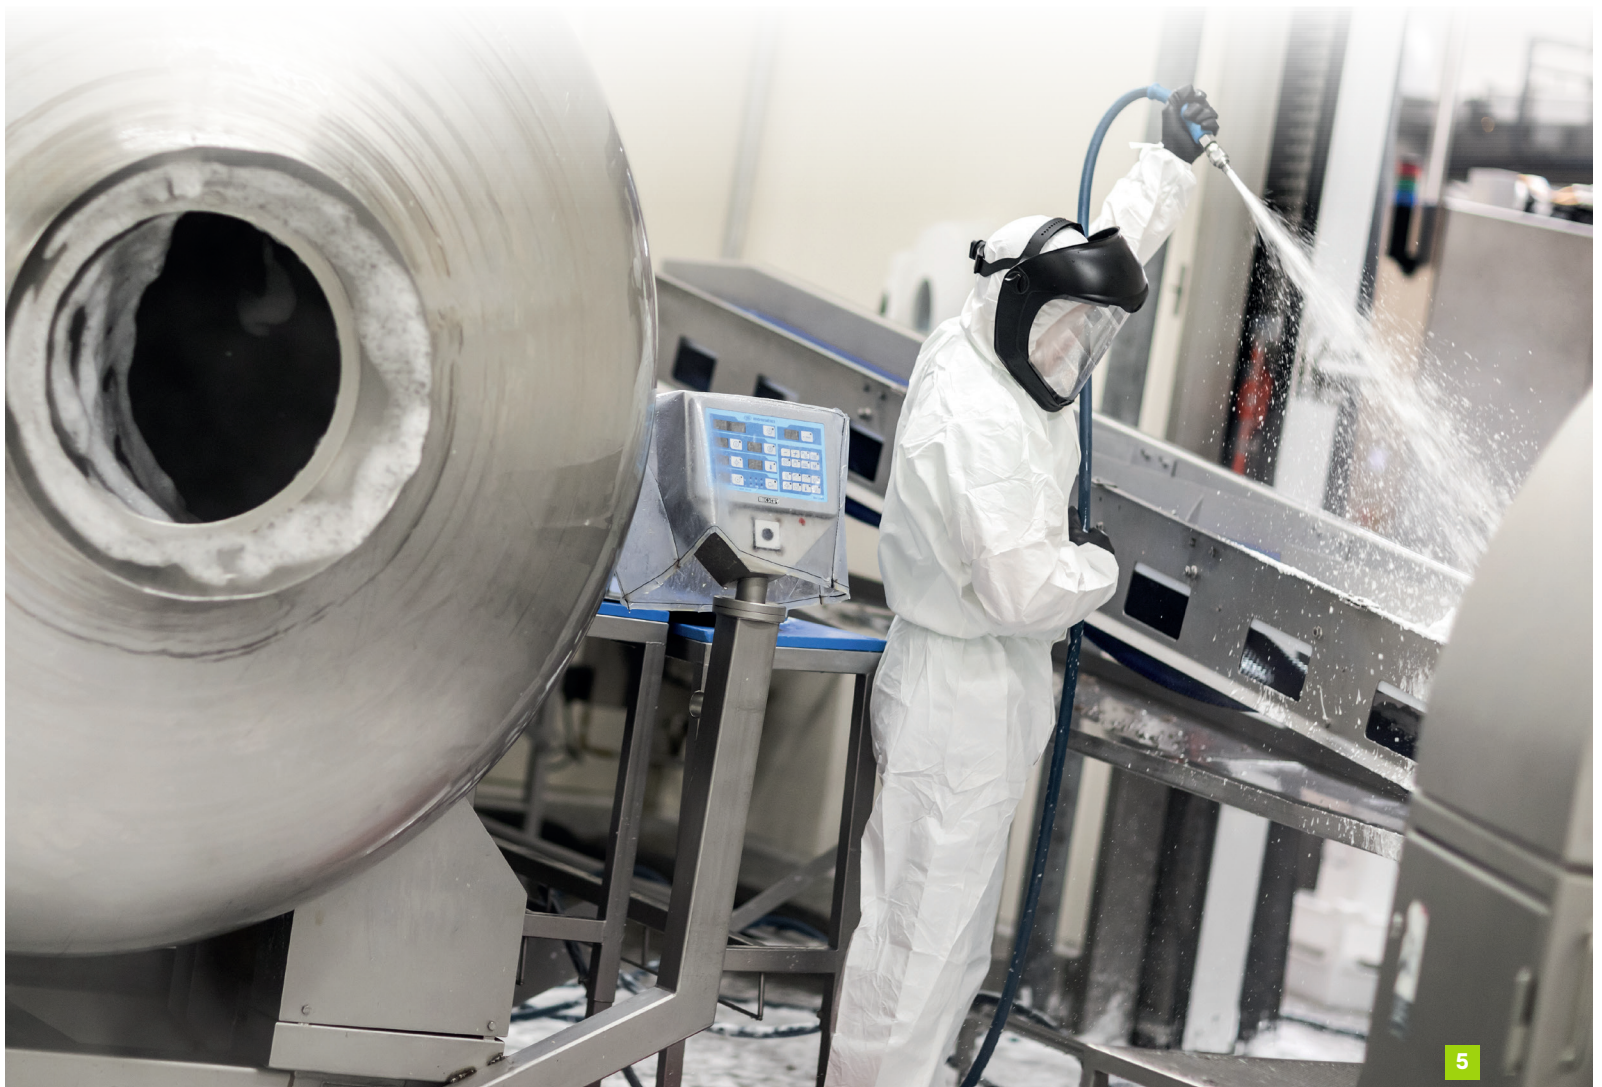

## Sanosept 80 H

### Disinfection

Low-foaming alkaline disinfectant for professional use. Ideal for the food industry and for removing green deposits. Only authorised as a means for combating bacteria (except mycobacteria and bacterial spores) and yeasts in a number of specific areas of application.

10L	200L	1000L	authorisation number 11928	12142
-----	------	-------	----------------------------	-------

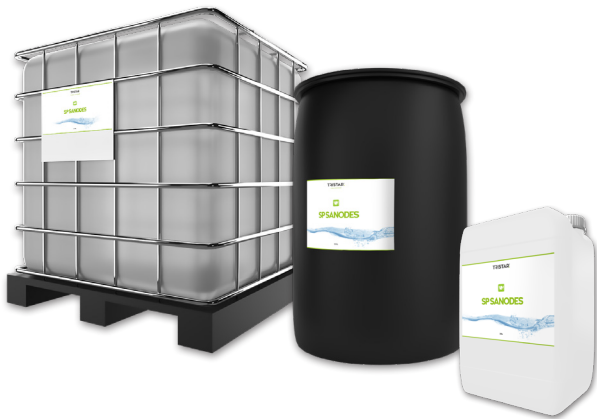

## SP Sanodes

### Disinfection

Disinfection product, especially developed for the food industry and health care. Only authorised as a means of combating bacteria (except mycobacteria) and yeasts in a number of specific areas of application.

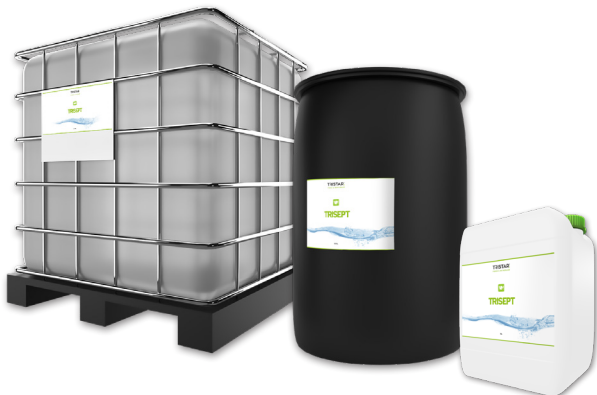

20L | 200L | 1000L | authorisation number 11968N 12143

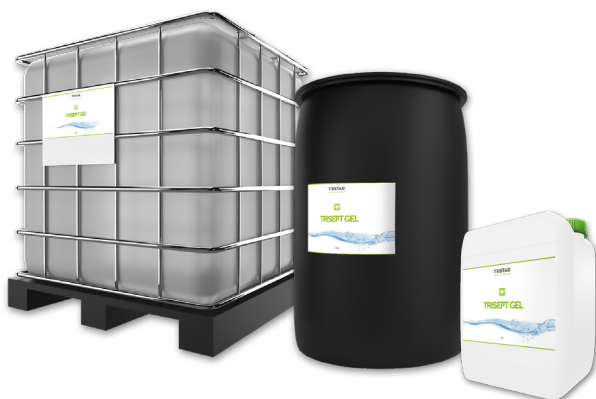

## TS TriSept

### Disinfection

An effective and authorised hand disinfectant based on 75% ethanol. Ideal as well for use in dispensers and disinfection columns. This product effectively combats bacteria (including mycobacteria), yeasts and viruses (non-enveloped viruses as well as enveloped viruses, such as the corona virus). The product is approved for professional use in a commercial or professional environment.

10L | 200L | 1000L | 95697

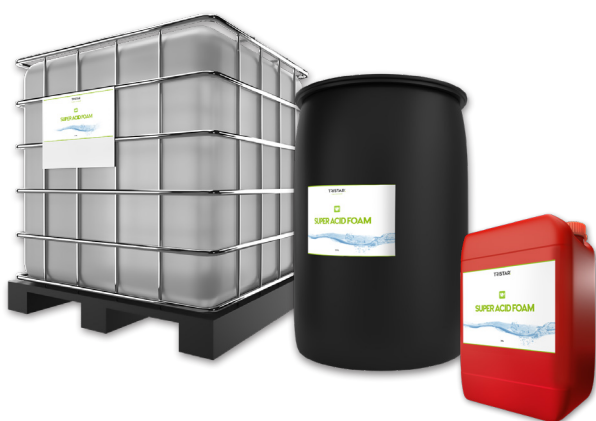

## TS TriSept Gel

### Disinfection

An effective and authorised hand disinfection gel based on 75% ethanol. Ideal as well for use in dispensers and disinfection columns. This product effectively combats bacteria (including mycobacteria), yeasts and viruses (non-enveloped viruses as well as enveloped viruses, such as the corona virus). The product is approved for professional use in a commercial or professional environment.

5L	200L	1000L	95698
----	------	-------	-------

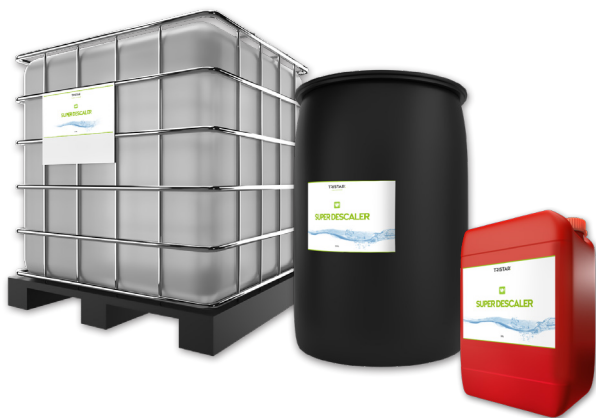

## Super Acid Foam

### Descaler

This highly concentrated, high foaming industrial descaler is ideally suited for the removal of layers of lime, rust and other oxides in industrial environments and installations as well as in the food industry. The product is completely inhibited, enabling treatment on almost any type of metal. The high foaming composition ensures a better cleaning and descaling of walls and other vertical surfaces.

5L	200L	1000L	10763
----	------	-------	-------

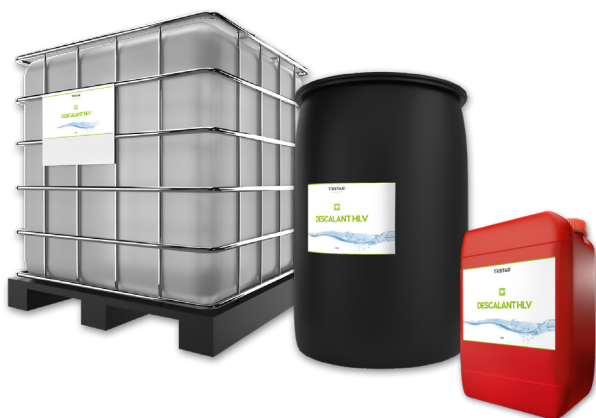

## Super Descaler

### Descaler

Low-foaming acid cleaner for the removal of lime and stone deposits and corrosion in tanks, pipelines and equipment in the food industry, particularly breweries, the soft drinks industry (fermentation and maturation tanks) and the dairy industry (butter churns, packing machines, tanks, pipes and centrifuges). Effectively removes organic and inorganic pollution, irrespective of the presence of CO<sub>2</sub>. Applicable for manual cleaning, circulation cleaning and in CIP systems.

10L	200L	1000L	10769
-----	------	-------	-------

## Descalant HLV

### Descaler

Highly concentrated acid cleaner based on inorganic acids. Especially suitable for cleaning equipment such as pasteurisers, sterilisers and evaporators. Suitable for the removal of salts and milk stone. The product is foam-free and is therefore suitable for use in CIP systems. This product is composed of the purest raw materials. All these raw materials are permitted in the food industry and are generally known by relevant authorities such as the FDA.
